13.2. GTCOSF – Grant Close-Out / Audit Status Folder	21
13.3. Alerts and Governance	21
13.4. Generate Alerts (Batch).....	21
13.5. Session 4 Demo Flow (Suggested)	22
14. Final Trainer Reminder	23

Chapter 1. How to Use This Document

This document is a **trainer reference**, not a slide script.

It is designed to: - Sit beside the delivery deck during live demos - Provide exact transaction/page intent and business rules - Support unscripted questions without derailing flow - Preserve institutional knowledge across GLM stages

GLM should be positioned as the **system of record for grant intent, decisions, and compliance**, distinct from budgeting, accounting, and payments.

Chapter 2. GLM Lifecycle Overview

GLM tracks the full lifecycle of a grant from **opportunity awareness** through **close-out and audit**.

The lifecycle progresses through seven stages:

1. Opportunity Identification
2. Response Decision
3. Application
4. Award
5. Post-Award Alignment
6. Amendment
7. Close-Out / Audit

The lifecycle is anchored by the **Grant ID**, which is created at application and persists through award, amendment, and close-out.

All stages roll up into the **Grant Tracking Summary (GRNTSUM)** inquiry.

SESSION 1 (45 Minutes)

Chapter 3. GLM Overview + Stage 1: Opportunity Identification

3.1. Session Purpose

Introduce GLM as a lifecycle tracking system that answers: - Why a grant exists - Who made decisions - When actions occurred - What obligations were created

Emphasize that GLM: - Does **not** create budgets - Does **not** post accounting entries - Does provide authoritative audit context

Chapter 4. Stage 1 – Opportunity Identification

4.1. GTAOD – Available Grant Opportunity Detail

Purpose

Stores grant opportunity data imported from Grants.gov.

Key Characteristics

- Loaded via batch (Update Grant Opportunity)
- Read-only reference
- External data source
- Not a lifecycle object

Trainer Emphasis

This is **intelligence ingestion**, not internal decision-making.

4.2. GTAOS – Available Grant Opportunity Summary

Purpose

Search and summarize available opportunities.

Key Characteristics

- Search/filter entry point
- Launch point for creating GTOP
- Used by agencies to triage opportunities

Trainer Emphasis

This is where agencies decide **whether** to engage.

4.3. GTOP – Grant Opportunity (Document)

Purpose

Creates the internal representation of a grant opportunity.

Creates / Updates

- GTOPSF (Opportunity Status Folder)
- GTNTSF (Notification Status Folder)

Key Characteristics

- Captures opportunity ownership
 - Establishes internal accountability
 - Enables notifications and alerts
-

4.4. GTOPSF – Grant Opportunity Status Folder

Core Sections

- General Information
- Funding Agency
- Funding Agency Contact
- Pass-Through Agency
- Comments

Business Rules

- Department required
- Opportunity ID must be unique
- Funding agency data drives downstream award context

Trainer Emphasis

GTOPSF is where an opportunity becomes **institutional knowledge**.

4.5. GTNTSF – Grant Notification Status Folder

Purpose

Identifies who is notified about the opportunity.

Key Characteristics

- Uses Grant Users or Alert User Groups
- Drives alerts and reminders
- Supports governance and accountability

Trainer Emphasis

Notifications are not just emails—they drive workflow discipline.

4.6. Batch Process – Update Grant Opportunity

Purpose

Imports Grants.gov XML into Advantage.

Key Characteristics

- Updates GTAOD and GTAOS
 - Typically centrally scheduled
 - Does not create lifecycle records
-

4.7. Session 1 Demo Flow (Suggested)

1. Search GTAOS
 2. Drill into GTAOD
 3. Create GTOP
 4. Walk GTOPSF tabs
 5. Review GTNTSF recipients
 6. Preview lifecycle in GRNTSUM
-

SESSION 2 (45 Minutes)

Chapter 5. Stage 2: Response + Stage 3: Application

5.1. Session Framing

Stages 2 and 3 answer: - Are we applying? - What did we submit?

This is where **governance** turns into **execution**.

Chapter 6. Stage 2 – Response

6.1. GTRE – Grant Response (Document)

Purpose

Records the agency's decision to apply or not apply.

Updates

- GTRESF
-

6.2. GTRESF – Grant Response Status Folder

Tracks

- Apply / Not Apply decision
- Decline reason
- Decision date

Business Rules

- Decision required
- Decline reason required if “Not Apply”
- Completion date required once response entered

Trainer Emphasis

GTRESF preserves decision history and prevents silent drop-off.

Chapter 7. Stage 3 – Application

7.1. GTAP – Grant Application (Document)

Purpose

Creates the formal grant application record.

Updates

- GTAPSF

Critical Concept

The **Grant ID** is created here and persists for the full lifecycle.

7.2. GTAPSF – Grant Application Status Folder

Core Sections

- General Information
- Contact Information
- Pre-Application Information
- Application Information
- Supporting Agencies
- Application Dates
- Comments

Key Business Rules

- Grant ID is mandatory and persistent
- Contact information is required
- Date rows require a grant date code
- Date templates reduce audit risk

Trainer Emphasis

Opportunity ID and Grant ID are not the same—and serve different purposes.

7.3. Session 2 Demo Flow (Suggested)

1. Open GTRESF and record Apply decision
 2. Create GTAP
 3. Walk GTAPSF sections
 4. Emphasize Grant ID continuity
-

5. Review lifecycle status in GRNTSUM

SESSION 3 (45 Minutes)

Chapter 8. Stage 4: Award + Stage 5: Post-Award Alignment

8.1. Session Framing

Stage 4 converts intent into obligation. Stage 5 positions GLM as the authoritative context provider.

Chapter 9. Stage 4 – Award

9.1. GTAW – Grant Award (Document)

Purpose

Records award details and acceptance.

Updates

- GTAWSF
-

9.2. GTAWSF – Grant Award Status Folder

Core Sections

- General Information
- Grant Award Information
- Agreement Information
- Award Administrator Contact
- Award Dates
- Comments

Critical Business Rules

- Awarded Amount required
- Award Notification Date required
- Awarded amount becomes amendment baseline

Trainer Emphasis

Awards lock history; amendments layer changes.

Chapter 10. Stage 5 – Post-Award Alignment

What GLM Does Not Do

- Create budgets
- Distribute funds
- Post accounting transactions

What GLM Does

- Maintain authoritative award record
- Provide reporting and audit context
- Integrate with Cost Accounting and compliance processes

Trainer Positioning

GLM explains **why** money exists—not how it moves.

10.1. Session 3 Demo Flow (Suggested)

1. Create GTAW from application
 2. Walk GTAWSF tabs
 3. Highlight awarded amount rules
 4. Explain downstream integration
 5. Review GRNTSUM award status
-

SESSION 4 (45 Minutes)

Chapter 11. Stage 6: Amendment + Stage 7: Close-Out / Audit

11.1. Session Framing

Most grant risk lives in change management and closure.

Chapter 12. Stage 6 – Amendment

12.1. GTAM – Grant Amendment (Document)

Purpose

Records changes to an awarded grant.

Updates

- GTAMSF
-

12.2. GTAMSF – Grant Amendment Status Folder

Amendment Types

- Dollar change
- End date change
- Scope change
- Termination
- Return of funds

Business Rules

- Amendment type drives required fields
- Amendments do not overwrite award history
- Awarded amount becomes cumulative

Trainer Emphasis

Amendments preserve intent and chronology.

Chapter 13. Stage 7 – Close-Out and Audit

13.1. GTCO – Grant Close-Out / Audit (Document)

Purpose

Records audit completion and closes the grant.

Updates

- GTCOSF
-

13.2. GTCOSF – Grant Close-Out / Audit Status Folder

Tracks

- Audit status
- Final reporting
- Grant closure

System Behavior

- Close Grant may inactivate grant-related accounting codes
- Opportunity lifecycle is finalized

Trainer Emphasis

Close-out is a control point, not paperwork.

13.3. Alerts and Governance

13.4. Generate Alerts (Batch)

Purpose

Sends reminders for:

- Missing responses
- Incomplete applications
- Reporting deadlines
- Pending close-outs

Trainer Emphasis

Alerts reduce institutional risk and reliance on memory.

13.5. Session 4 Demo Flow (Suggested)

1. Open GTAMSF and apply amendment
 2. Show cumulative impact
 3. Create GTCO
 4. Walk GTCOSF
 5. Review alert generation
 6. Final GRNTSUM walkthrough
-

Chapter 14. Final Trainer Reminder

GLM is the system of record for: - Grant intent - Decisions - Obligations - Compliance

It provides auditability, governance, and continuity across administrations, staff turnover, and funding cycles.
